

“Conscious canoers”

While canoeing on the river with your friends last weekend, you found a pipe leading into the river that had water flowing from it. There was a strange chemical smell in the air around the pipe. Although there was not a lot of water running into the river, the scene did not look safe to you.

- What is the difference between point and non-point source pollution?

- Which type of pollution is easier to regulate? Why?

- Who should you contact about the pipe in the river?

- What law may be being violated?
